About me

I am a Systems Engineer passionate about the DevSecOps approach in the cloud and an enthusiast of technological revolution. I love leading projects, automating processes, and providing backend solutions for innovative applications.

With work experience on various projects, I take pride in demonstrating exceptional skills and approaching challenges with dedication, responsibility, and enthusiasm to achieve the most satisfactory resolutions.

I am excited to continue growing professionally and take on new challenges in the world of technology. I look forward to contributing my passion and expertise to exciting and transformative projects!

Qualities

Commitment, dedication and responsibility in my tasks. Entrepreneur. Involvement in each process. Positive attitude and work proactivity. Adaptability to change. Sincerity
